Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement		
1. Statement			
Novelty (N)	Claims	1-4	YES
	Claims		NO
Inventive step (IS)	Claims		YES
	Claims	1-4	NO
Industrial applicability (IA)	Claims	1-4	YES
	Claims		NO
2. Citations and explanations (Rule 70.7)			
Document 1: JP 6-178379 A (Sony Corp.), 10 December 1994			
Claims 1 to 4			
<p>Document 1 discloses a stereo sound reproduction device whereby the sounds emitted from highly directional speakers are reflected off of acoustic reflection panels that have been disposed to the rear of a viewer in order to achieve an effect identical to that of a system in which rear speakers have been disposed to the rear of the viewer, wherein speakers are disposed on the left side and the right side of the video display unit and highly directional speakers are disposed in the vicinity thereof so that it is possible to produce sound effects by means of the sounds from the speakers in question.</p>			
<p>A comparison of the invention set forth in claims 1 to 4 and the invention disclosed in document 1 showed that the inventions in question are substantially the same, with the exception of the fact that at least one characteristic selected from among the frequency/gain characteristic, the frequency/phase characteristic and the gain characteristic of the acoustic signals that are input into the directional speakers is corrected in order to attain desired acoustic characteristics at the viewing</p>

position in the invention that is set forth in claims 1 to 4, whereas document 1 does not indicate whether or not similar corrections are carried out in the invention that is disclosed therein.

However, when configuring a stereo sound reproduction device it would have been easy for a person skilled in the art to configure so that the characteristics of the audio signals that are input into the directional speakers are corrected in order to attain desired acoustic characteristics at the viewing position, as appropriate.

Such being the case, the invention that is set forth in claims 1 to 4 of the present application could easily have been invented by a person skilled in the art in the light of the invention that is disclosed in document 1.
